

M TM Master® software suite

Smarter ship operations with TM Master

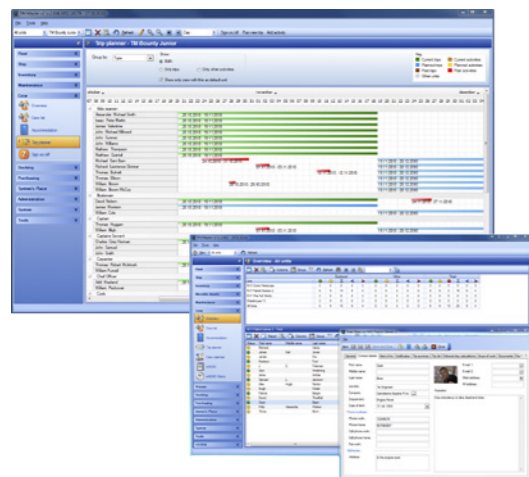

Fleet management made easy

Tero Marine from Norway is the provider of the **TM Master software suite**. TM Master has established itself as one of the leading fleet management solutions – especially since the launch of the acclaimed **TM Master V2** in 2007. More than 2000 TM Master systems have been licensed worldwide, catering to a variety of vessels, from advanced tankers to OSVs, tugs and naval ships.

- P TM PROCUREMENT
- M TM MAINTENANCE
- H TM HUMAN RESOURCES
- Q TM QUALITY & ENVIRONMENT

TM Master consists of four core modules: TM Maintenance, TM Procurement, TM Quality & Environment and TM Human Resources. These modules have seen some major additions the last year: *Forecasting, Document management, Incidents, Voyage E-log, Failure reporting and Audit* are among the new features added to the suite.

These additions will make TM Master even more powerful, making it the perfect tool for increased management and cost control, supporting ship operations from planning through execution. With TM Master you will have complete control over purchases, maintenance tasks, voyage logs, incidents, crew needs, environmental demands, and every other piece of information you need to stay in charge – no matter the size of your fleet.

Please get in touch with us at www.teromarine.com.

Stay connected and updated

By installing TM Master both on the vessel and in the office, everyone involved in fleet operations will have access to vital, and always updated, information. A fully integrated software solution will enable you to save time and resources when planning and executing your operations. Integration with third-party solutions also means that TM Master can be the most important information hub in your fleet management.
